## SWIFT MARK II BINOCULARS (6 MODELS)

Our highest in quality and originality. The line includes three extra wide angle glasses: the "Audubon", master bird-watchers glass; the lightweight 7X,50 "Commodore" wide angle marine glass; and "Holiday", super wide field — also the compact "Neptune" 7X,35 with a field of 420'; plus two waterproof and fog-proof "Storm King" models (7X,35 and 7X,50).

Prisms are slotted barium crown glass; objective lenses are of selected crown and flint glass with ultraviolet coating. Composition retractable eyecups bring maximum view and comfort to eyeglass or non-eyeglass wearers. Each glass is complete with luxurious hard cases which include neck and case straps.

**LIFETIME GUARANTEE :** We replace or repair defective workmanship or materials in instruments mailed to us postpaid.

# SWIFT<sup>®</sup> MARK II BINOCULARS

Swift's finest binoculars! The Mark II represents the most outstanding binocular value sold anywhere. Swift Mark II Binoculars incorporate lenses and prisms of the finest center-pot Barium Crown glass. All air-to-glass surfaces have a hard amber coating\* to reduce reflections and internal glare to an absolute minimum. Unique ultraviolet inhibitor coating on objective lenses provides squint-free, sun-safe viewing. Slotted prisms, solidly secured with precision Phosphor-Bronze clamps, prevent diffusion and enhance image definition. These superb optics are housed in a seamless monobloc body of ultra-light alloy.

Complete with convertible rubber eyecups for easy eyeglass viewing. All Mark II Binoculars have a smartly contemporary charcoal and brushed chrome non-reflective finish.

Plush lined black cowhide grain carrying case and straps.

Elegantly gift boxed.

\*717 & 718 - Have only magenta coating

**823 — COMMODORE MK II WIDE ANGLE,**  
7X,50 C.F. (488 ft.) — 40 oz. — RLE 84.2

The contemporary version of the traditional deck officer's night glass. An exceptionally large 7.14mm exit pupil and a high relative light efficiency of 84.2 give this binocular extraordinary light-gathering properties that enable you to see details that are ordinarily hidden to most binoculars, especially in poor light situations such as at dawn or dusk, even clouded moonlight. It almost seems to produce its own light. The field of view is 488 ft. Its weight is only 40 oz. Center focus with close focusing down to 15 ft. Handsome cowhide grain carrying case with straps. Gift boxed.

**802 — NEPTUNE MK II**  
7X,35 C.F. (420 ft.) — 23 oz. — RLE 41.3

One of the lightest and most precise general-purpose binoculars available. Exceptional for spectator sports, hunting, nature studies and general viewing. Its extreme light weight (only 23 oz.) contributes to its convenience. Its large 5mm light-gathering exit pupil and relative light efficiency of 41.3 produce truly superior performance characteristics for its size. The field of view is 420 ft., which makes it simple to scan and spot virtually any fast-moving subject. Center focus with clear, close focusing down to 15 ft. Complete with black cowhide grain carrying case and straps. Gift boxed.

**717 — STORM KING MK II**  
7X,50 I.F. (383 ft.) — 52.20 oz. — RLE 84.2

An all-new, all-weather, waterproof binocular designed to meet or exceed Government specifications. A true Submarine Officer's night glass that provides outstanding see-ability in the most unfavorable conditions. Larger than average exit pupil (7.14mm), higher relative light efficiency and 50mm objective lenses produce razor-sharp images under minimal light conditions, when your life may depend on it. Individual focus to preserve watertight integrity. Close focuses to 21 ft. Attractive case. Gift boxed.

**718 — STORM KING**  
7x, 35 I.F. (393 ft.) — 24 oz. — RLE 41.3  
Has all the characteristics of the 717  
All weather, waterproof, fog proof.
